

SOLAR PV INSTALLATION PROFESSIONAL

JOB POSTING

About Ecotech:

We're a values-driven business designing and installing solar-electric systems for homes and businesses in northwest Washington. Since our founding in 2004 as the first solar contractor in Whatcom County, we've completed over 800 solar projects, become an industry leader in the state and built lasting connections that have earned us a reputation for integrity. We're very good at what we do and have fun doing it. We care deeply about people – our customers, employees, and community. Our technical expertise is second to none and we strive for excellence in all things – design, installation and customer service.

Job Description:

We're looking for someone to join our highly skilled field team of experienced solar PV installers and electricians. This position requires a high level of teachability, solid work ethic, great interpersonal communication skills, and a team-oriented attitude. You will be responsible for working as part of an installation team to make roof attachments, set up solar mounting brackets, install solar panels, and wire solar inverters (under the supervision of a licensed journeymen electrician), while engaging clients in a friendly and professional manner.

Responsibilities:

- Install solar mounting brackets and solar panels according to industry and company best practice guidelines
- Complete supervised AC and DC electrical work per National Electric Code and WAC requirements
- Engage clients in friendly and professional manner

We're Looking for Someone Who Is:

- Able to work well with others in a team-oriented environment
- Teachable and ready to learn
- Able to take initiative and work effectively with little or no supervision
- An excellent communicator

- Able to demonstrate strong attention to detail and high standard for quality
- Excited about solar energy and is committed to becoming an expert in the mechanical and electrical aspects of the solar PV installation process
- Outgoing and has a genuine interest in people
- Committed to exceptional customer service
- Comfortable with heights
- Able to regularly carry 50lbs+ up ladders
- Okay working outdoors in all weather
- Experienced in carpentry, framing, roofing, electrical, or other building trades

We're ultimately more interested in who you are than what you know. Integrity, personality and intelligence are paramount.

If you have the following experience, please let us know:

(These are not required, just a bonus if you are the right fit for our team)

- NABCEP PV Installation Professional Certification
- Prior solar installation experience
- A bachelors or masters level degree
- General construction understanding or experience

What we offer you:

- Full-time position based in Bellingham, WA
- Education, training and mentorship
- Competitive wage commensurate with experience
- Generous 401(k) match
- Paid holidays and vacation
- Some electrical continuing education fees covered
- A positive, collaborative work environment
- A career in a growing field doing work you can feel good about

To apply:

We strongly recommend you take a minute to familiarize yourself with our website before applying. Please send resume and cover letter to careers@ecotechsolar.com (no phone calls or drop-ins, please). Tell us why you're interested in this role, why you'd be good at it and why you'd be a great addition to our team.

Application is open until filled (our need is immediate, but we're not going to fill this role with just anyone - we're willing to wait for the right fit). We look forward to learning more about you!
